UniBlade Flush Lantern

The UniBlade Flush is our new design for hall lanterns. The design is clean and modern, with a range of colour options for the body such as natural, black and white.

The UniBlade lantern is ideal for use in a lift lobby where there are three or more cars and it is not always easy to see which lift has arrived. The UniBlade Flush lantern is mounted flush to the wall and when illuminated, clearly identifies the lift that has arrived.

The front panel of the UniBlade Flush Hall Lantern are available in black or white, with a range of illumination colours.

The unit's design looks 'custom' but this is a standard production unit that offers excellent value for money.

KEY FEATURES

- Smart, modern appearance
- Front panel colour avialable in black or white, others colours on request
- Easy installation, with or without faceplate
- Meets DDA requirements
- Wide range of colour options
- Gong optional
